332510 Hardware Manufacturing
488119 Other Airport Operations

Federal Supply Codes (FSCs)

1670 - Parachute Aerial Pick-up, Delivery & Recovery Systems & Tie Down Equipment
3940 - Blocks Tackle Rigging & Slings
4010 - Chain and Wire Rope
4030 - Fittings for Rope Cable & Chain
5180 - Sets Kits & Outfits of Hand Tools
5340 - Miscellaneous Hardware
8115 - Boxes, Cartons and Crates
8145 - Special Shipping & Storage Containers

PPCS Doing Business With:

Capability Overview:

Pikes Peak Cargo Secure, Inc. (PPCS) manufactures the **Modular Intermodal Logistics System (MiLS™)** a comprehensive suite of tactical pallet on load assembly platforms with our containers and straps, tie-downs, slings, pallets, and heavy duty container/vehicle

recovery systems that are Class IX and NSN'd (or pending) to provide "**Logistical Support to the Last Tactical Mile**".

Core Competencies:

The MiLS™ suite of products includes the **FICCS™** (Flexible Integrated Collapsible Container Systems™) and the **VATTS®** (Variable All Terrain Tie Down Systems®).

Configured Load Concept:

PPCS developed the **TL-FICCS™**, **AL-FICCS™** and **CL-FICCS™** in response to the need for collapsible and reusable tactical containers. These systems are designed to be loaded and strapped onto the 463L's, placed into MILVANs (*with minimal to no blocking and bracing*), and onto most military vehicles. These containers along with the new aluminum footlocker system (LOC-FICCS™) are designed to reduce the MILVAN requirements for deployment and redeployment. Typical load weights and manpower requirements to prepare shipments in Depot "Returnable/Reloadable" systems are substantially reduced.

The patented **VATTS® (Variable All Terrain Tiedown Systems®)** are tools for Cargo Securement and Tiedown Restraint for Transport of all Classes of Supplies (including the new MRAP vehicles) and Lifting and Securing of Containers and Vehicles (All Modes). The -FICCS™ systems are specifically designed for use with VATTS®.

Vehicle Recovery:

PPCS has developed Self- and Like-Vehicle Recovery Systems (Combat/ Non-combat situations) with a variety of options. They include chain systems and light-weight strap systems with quick connect links which reduce the need for exiting the recovery vehicle in combat situations.

Durability:

PPCS products are extremely **durable** in all environments and weather conditions. Our new Container Liners protect items stored in our **TL-FICCS™** and **AL-FICCS™** during rain, snow and sand storms. Due to the construction durability of all our products; the user will enjoy a great **cost savings** as our products are **long lasting** for many years to come. No need to reorder white cardboard containers or blocking and bracing materials after each use.

New Capabilities:

PPCS now has Aluminum Industrial Table and Bench Kits in two kit sizes; **large** – includes 5 tables and 10 benches which is shipped in one of our TL-FICCS™ Containers and strapped in with four of our 1 inch HUM VATTS® Ratchet Straps; and **small** – includes 2 tables and 4 benches which is shipped in one of our AL-FICCS™ Containers and strapped in with the same four straps as the large kit.

GSA:

PPCS has a GSA Advantage Schedule (GS-02F-0065P) for the use of government agencies who do not have the ability to order via DLA and through the Class IX procedures.

DLA:

See our Cage Code of (3CVN2) or our Class IX NSNs mostly beginning with FSCM of 8145 and recently assigned 3990 (Pallet Covers) and 5340 (MRAP Strap).
